

Protect fire sprinklers from heat and steam during HVAC brazing

Flame & Steam Protection

BrazeSafe shields fire sprinklers from the intense heat and steam produced by torches, preventing accidental activation or damage.

Reusable & Durable

Designed for repeated use without losing its protective properties. Lightweight and easy to carry, making it an essential tool for HVAC technicians.

Patent-Pending Design

BrazeSafe is innovatively engineered to protect fire sprinklers during HVAC brazing, offering unmatched security and reliability.
